

Greetings,

I need a little input on what other Depositories do with Environmental Impact Reports (EIRs).

Do you keep and catalog local EIRs for historic purposes?

Are there some that are not "historic" and therefore don't need to be kept?

Should the final copy be kept, not drafts?

How substantial does an EIR have to be, to be retained?

Should EIRs outside of jurisdiction be kept in Documents according to your judgment (SuperFund Sites) and the rest discarded after the relevant comment time period?

TIA, thanks in advance

Gover'nance
